

**BONUS 5 OF 6**

# Serving Instructions for Your Customers.

A ready-to-print insert card that teaches your customers exactly how to turn a capsule into a creamy cappuccino — drop it straight into any kit or gift box.

## Why this insert matters

*"The instructions aren't just practical — they're part of the gift. A well-designed insert card is often the first thing your customer photographs and shares."*

Not every customer has seen a cappuccino capsule before. A short, clear insert avoids confused first-time messages ("do I microwave it?") and makes the unboxing feel complete and professional — like a real product, not a homemade favor.

The next page is designed to be **printed and cut to size** (roughly a 4×6in / 10×15cm card) and dropped into every kit or gift box you sell, right alongside the capsules.

# How to enjoy your capsule

Cut along the dashed border and include one per kit.

## How to Enjoy Your Cappuccino Capsule

1

### Heat your milk.

Warm 6-8 fl oz (180-240 ml) of milk (dairy or your favorite alternative) until hot but not boiling.

2

### Drop the capsule in.

Place one capsule into your mug and pour the hot milk directly over it.

3

### Watch it melt.

Give it 20-30 seconds — the chocolate shell melts and the flavored filling dissolves into the milk.

4

### Stir gently.

A few stirs blend everything into a smooth, creamy cappuccino.

5

### Enjoy.

Best enjoyed right away, while warm. Store any extra capsules in a cool, dry place, away from direct sunlight.

OPTIONAL INSERT

## Serving variations

A short extra section you can add to the same insert or a second card for repeat customers.

**Extra creamy** — use whole milk and stir in a splash more after melting for a richer cup.

**Frothy top** — froth your milk before pouring for a café-style finish.

**Iced version** — melt the capsule in a small amount of hot milk first, then pour over ice and top with cold milk.

**Dairy-free** — works well with oat or almond milk; heat slightly higher as plant milks take a touch longer to dissolve the shell evenly.

✓ **Presentation tip.** Suggest customers photograph the capsule mid-melt for social sharing — it's the same "reveal moment" that sells the product in Bonus 3, and customers sharing it is free promotion for you.

# Ready for every kit.

Print this insert once, reuse it in every box — your customers will always know exactly how to enjoy what you made for them.
