

The Sold-Out Bootie Blueprint

90-day money-making roadmap · from your first Etsy listing to \$1,000 in the bank

The Sold-Out Bootie Blueprint

90 days. Week by week. From your first Etsy listing to your first \$1,000 in the bank. This is not motivational content. It's a calendar. A checklist. A this-week-do-this-not-that structure. If you follow the weekly cadence for the full 12 weeks, the average outcome is \$1,000-\$3,500 in accumulated revenue by end of week 12.

Phase 1 — Days 1-30 · Build the shop that converts

Week 1 (days 1-7): The 4-listing minimum viable shop

- Day 1: Open Etsy shop (use your real name + "Handmade" — e.g. "SarahHandmade"). Fill in About + Policies from templates in bonus.
- Day 2: Photograph 4 completed booties using the Photography Kit setup (Bonus 4). Aim for 5 photos per listing.
- Day 3: List Bootie 1 — write the title using the SEO tag formula. Copy Description Template A from the SEO Tags doc.
- Day 4: List Bootie 2 (different color, different age range).
- Day 5: List Bootie 3 (holiday variant if applicable, otherwise "gift" positioning).
- Day 6: List Bootie 4 (custom color or twin set — the AOV anchor).
- Day 7: Set up shipping profiles. Buy your first roll of tissue + kraft envelope stock (~\$25 investment).

Week 2 (days 8-14): Turn on Pinterest

- Day 8: Open Pinterest business account.
- Day 9: Create 3 boards using the Pinterest Blueprint (Bonus 2) — Baby Shower Gifts / Handmade for Baby / Newborn Photo Ideas.
- Day 10-14: Pin 5 pins per day from your 4 listings — one direct-photo pin + one lifestyle pin + one text-overlay pin per listing.
- By end of week 2: 25-35 pins live. Pinterest typically starts sending you traffic in week 3-4.

Week 3 (days 15-21): The 3 Facebook groups + first Reel

- Day 15-17: Join 3 groups from the Facebook Groups Directory (Bonus 2). Read each group's rules carefully. Comment on 3-5 posts before ever mentioning your shop.

- Day 18: Post your first Reel using template #1 from the 60 Scroll-Stop Reel Templates (Bonus 1). Cross-post to IG + TikTok.
- Day 19-21: Answer any DMs / comments same-day. Prep next week's content.

Week 4 (days 22-30): First cold email pitch

- Day 22: Identify 5 local baby boutiques (Google + Instagram search).
- Day 23: Send 5 cold emails using Wholesale Script #1 (Bonus 3).
- Day 24-27: Follow up with each after 3 days if no reply (Wholesale Script #2).
- Day 28-30: Post 2 more Reels. Add 2 more listings. Review your Etsy analytics — which listing got the most views?

Phase 2 — Days 31-60 • Turn on traffic channels

Weeks 5-6: Pinterest velocity

- Pin 10 per day (batch on Sunday, schedule with Pinterest Scheduler).
- Add 4 more listings (aim for 12 total by end of week 6).
- First wholesale reply typically lands in week 5-6. Respond within 4 hours. Send sample offer using Wholesale Script #3.

Weeks 7-8: Reel weekly rhythm + first Custom Order

- 1 Reel every Monday, Wednesday, Friday. Rotate templates 1-15 from Bonus 1.
- Set up the Custom Order Landing Page (see OTO 3 bonus if you have it, otherwise a Notion page).
- Add the custom link to IG bio + Etsy Shop Announcement.
- First custom order inquiry typically lands week 7-8. Quote within 2 hours using the saved-replies (OTO 3 if you have it).

Phase 3 — Days 61-90 • Double down + lock in \$1,000

Weeks 9-10: Kill what doesn't work, scale what does

- Look at Etsy analytics. Which 2 listings got the most sales? Make 3 variations of each (color / age / theme).
- Which Reel got the most views? Make 3 variants of that hook.
- Which Pinterest board got the most impressions? Double the pinning on that board.
- Delete or rework the lowest-performing listing.

Weeks 11-12: The \$1,000 push

- Do the math: how much revenue do you have accumulated? Subtract from \$1,000. Divide by your average price. That's how many booties you need to sell in the next 14 days.

- Push harder on your top channel — if Pinterest is bringing traffic, pin more. If wholesale is landing, email 5 more shops.
- Announce a "holiday drop" or "end of month special" (real, not fake) on IG stories.
- By day 90: \$1,000 accumulated is the target for the average dedicated seller who runs this blueprint. Some hit it by day 60. Some at day 100. The system doesn't care about "average" — it works because you followed it.

The math you should track weekly

Metric	Where to find it	Week 4 target	Week 8 target	Week 12 target
Total sales (\$)	Etsy dashboard	\$50-150	\$300-600	\$1,000-3,500
Listings live	Etsy Shop Manager	4-6	10-14	18-25
Pinterest views/mo	Pinterest analytics	500	5,000	20,000+
Reels views total	IG insights	500	5,000	20,000+
Custom order inquiries	Manual count	0-2	3-8	10-20
Wholesale replies	Manual count	0-1	1-3	3-6

What to do when things stall

If week 4-6 comes and no sales yet, the fix is almost always ONE of these three:

- 1 **Photos are the problem** — retake using the Photography Kit setup. Compare to top-selling shops in your niche.
- 2 **SEO tags are wrong** — swap in tags from the 27 SEO Tags list (bonus). Rewrite titles.
- 3 **You're not pinning enough** — 3-5 pins per day for 30 days is the minimum to move the Pinterest needle.

If you've done all three and week 8 comes with no sales — email me. That's a signal something specific to your shop needs a diagnostic look, and it's included in your lifetime access.

The rule that separates the sold-out shops from the rest

"Consistent presence in 3 channels beats brilliant presence in 1 channel, always. The shop that lists on Etsy AND pins on Pinterest AND posts weekly Reels outsells the shop with the best photos on Etsy alone. Every time. The math is boring. Do the math anyway."

60 Scroll-Stop Reel Templates

30 process-first + 30 finished-piece-hero · 9:16 Reels, hook + audio + caption ready

60 Scroll-Stop Reel Templates

Pre-edited 9:16 Reel scripts. 30 process-first (start with proof) + 30 finished-piece-hero (start with the item). Each template gives you: **hook line**, **visual instruction**, **audio suggestion**, and **caption skeleton**.

How to use these

- 1 Pick the 3 templates that match a bootie you already have finished.
- 2 Set up your phone on a small tripod. Use the Photography Kit lighting setup (Bonus 4).
- 3 Record: hook shot (1-2 sec) → visual proof (5-15 sec) → CTA text overlay (last 2 sec).
- 4 Add the suggested audio in CapCut. Trim to 12-25 seconds.
- 5 Post to Instagram Reels + TikTok simultaneously. Cross-post to Pinterest as a video pin.
- 6 Rotate 3 templates per week for the first 12 weeks. Don't repeat the same template within 30 days.

The Scroll-Stop Formula (why these work)

3 elements that make a crochet Reel stop the scroll: (1) **finished-piece hook** in the first second — the bootie hero shot, not the process. (2) **Rhythm-cut process** at music speed in seconds 1-15 — retention. (3) **Baby-shower / gift emotional CTA** in seconds 16-25 — save + share. Most crocheters film process from second zero and lose 80% of viewers. This inversion is the whole game.

Process-first — 30 templates

Each template: hook line → visual sequence → audio type → caption skeleton.

Batch production tip

Set aside one Sunday afternoon per month. Set up your workspace with 3 different bootie colorways. Record all 12 hook shots first (front camera, one after another). Then all 12 process clips. Then all 12 finished-piece heros. You end up with enough raw footage for 4-6 Reels per week for the entire month, done in a 3-hour block.

The Pinterest & Facebook Groups Launcher

12 Pinterest board templates (SEO-loaded) + 200+ curated Facebook groups for baby-craft sellers

The Pinterest & Facebook Groups Launcher

Two channels that most crocheters ignore because they're not sexy. Both send warm, high-intent traffic to your Etsy shop for free. This document has: **12 Pinterest board templates** with SEO-loaded descriptions + **200+ curated Facebook groups** where baby-craft mothers hang out, with the posting rules of each so you don't get banned week one.

Part 1 — 12 Pinterest Board Templates

Create these 12 boards on your Pinterest business account. Copy the descriptions verbatim (they contain the SEO keywords Pinterest ranks for). Pin 5-10 pins per day across these boards.

Pin cadence

- Days 1-14: 5 pins per day. Batch on Sunday, schedule using Pinterest Business Scheduler (native, free).
- Days 15-30: 10 pins per day. Include repin from other cottage-craft accounts (10% max — Pinterest penalizes shops that only pin their own work).
- Days 30+: 8-15 pins per day sustained. Pinterest starts sending you sustained traffic in weeks 3-4. By week 8-12, expect 500-5,000 visitors per month at zero ad cost.

Part 2 — Facebook Groups Directory (Top 100 by size + activity)

Every group listed below has: (a) 5,000+ members, (b) allows Etsy shop mentions in dedicated "Share your shop" days, (c) is active (posts within last 7 days). Search each name in Facebook, request to join, and read the pinned rules before posting.

Rules that get you banned

- Never post a shop link in your first 3 comments in a new group. Comment on 3-5 other posts first, warmly, adding value.
- Every group has a "Share your shop" day (usually Sunday or Friday). Post only on that day, only in the pinned thread.
- Never DM a mom in the group asking her to buy. Instant ban from most groups.
- Include a photo with every post. Text-only posts have <5% engagement.
- Reply to every comment on your post within 24 hours. Warm relationships → 3-5 messages per post that convert.

The math on FB groups

One consistent hour per week in the right 5-10 groups typically generates 4-8 Etsy shop visits per day (~150-250/mo) within the first month. Conversion at ~2-4% gives 3-10 sales per month directly attributable

to group activity, at zero ad spend. Plus 5-15 followups on IG per month → warm audience for repeat sales.

The Wholesale Cold-Email Script Pack

10 templates to pitch local baby boutiques for repeat wholesale orders

The Wholesale Cold-Email Script Pack

Ten templates to pitch local baby boutiques for repeat wholesale orders. One order of 6 pairs at wholesale (\$22 each) pays your yarn for a month. Land 2-3 boutiques who reorder quarterly and you have \$2,000-4,000 of predictable revenue per year on autopilot. Each template includes: **subject line**, **opening line**, **full body**, **signature**, and **when to send**. Copy-paste into your Gmail. Send at 9-10 AM boutique-local time for highest reply rate.

Template 1 — First cold outreach (no prior relationship)

Subject line

Handmade baby booties for your boutique — 6-pair sample?

Body

Hi [BOUTIQUE OWNER NAME] — I own [YOUR SHOP NAME], a small handmade baby shop that specializes in crochet booties (newborn to 24 months). I've been following [BOUTIQUE NAME] on Instagram for a while and love how you curate small maker brands. I'd like to send you 2 sample pairs at no cost so you can feel the quality and see if they'd fit alongside your current baby collection. Wholesale pricing on repeat orders would be \$22/pair (retail \$38-42), MOQ 6 pairs. Here's my portfolio: [YOUR IG or ETSY LINK]. Happy to send colors that match your current inventory palette. Would you be open to 2 samples? I can ship this week. Thank you, [YOUR NAME]

When to send: Tuesday, Wednesday, or Thursday. Never Monday (inbox flood) or Friday (weekend brain).

Template 2 — Follow-up if no reply in 3 days

Subject line

Re: Handmade baby booties for your boutique — quick follow up

Body

Hi [NAME] — no worries if this got lost in the inbox ■ Just circling back on the sample offer. If it's not a fit for the season, no problem — happy to follow up in a few months. Or if you're open to samples, I can ship this week. Thank you, [YOUR NAME]

Template 3 — Warm follow-up after 2 weeks (still no reply)

Subject line

Loved this at [BOUTIQUE NAME] — thought of you

Body

Hi [NAME] — was walking past [SPECIFIC DETAIL YOU KNOW ABOUT THE BOUTIQUE — window display / product / event] and thought of you. Still open to sending you 2 sample booties if it's a fit for your baby corner. Otherwise, no follow-up from me — I don't want to be inbox spam. Sending love. [YOUR NAME]

Rule: after 3 unopened emails, stop. Never a 4th cold outreach. Damages your future warm-outreach chances.

Template 4 — Response to "send me the samples"

Subject line

Samples on the way + a few options

Body

Hi [NAME] — so happy you're open to samples ■ I'll ship 2 pairs on Wednesday. I'll pick from these palettes based on what matches your current inventory: • Cream + dusty rose (a classic best-seller) • Sage + cream (cottage-core, huge on IG right now) • Terracotta + cream (autumn / earthy) Just reply with which 2 palettes you want and I'll ship. Tracking landing in your inbox 3-5 days. If you love them, my wholesale terms are: \$22/pair, MOQ 6, net-30 payment, custom colors +\$3/pair. I can also offer consignment for the first order if that's easier. Excited! [YOUR NAME]

Template 5 — Response to "I'd like to place an order"

Subject line

Your first order — details + timeline

Body

Hi [NAME] — thrilled ■ Here's the summary of your first order: • [X] pairs at \$22 = \$[TOTAL] • Colors: [LIST] • Ship-by date: [DATE] • Payment: net-30 from ship date OR 50% deposit + 50% on ship Can you confirm which payment terms work? And do you want any personalization on the packaging (a small kraft

tag with your boutique name)? +\$1/pair for that. I'll ship in a padded box, individually wrapped in tissue. You should get them within 5-7 days of my ship notification. Excited to be in your shop! [YOUR NAME]

Template 6 — Following up 30 days after a delivered order

Subject line

How are the booties moving at [BOUTIQUE NAME]?

Body

Hi [NAME] — hope your season is going well! Just checking in on how the booties are moving. If you're running low or ready for a re-order (or a new color), I'm here. I'm also introducing 2 new items in [MONTH]: [ITEM 1] and [ITEM 2]. If your customers would enjoy either, happy to send samples at no cost. All the best, [YOUR NAME]

When to send: exactly 30 days after tracking shows "delivered". Set a calendar reminder. This one message typically generates a repeat order in 40-60% of cases.

Template 7 — Seasonal launch pitch (existing boutique client)

Subject line

Fall drop is ready — first look for [BOUTIQUE NAME]

Body

Hi [NAME] — my fall collection is done. Wanted you to see it first before I open orders to new boutiques. Highlights: • [ITEM 1 with photo attached] • [ITEM 2 with photo attached] • [ITEM 3 with photo attached] Same \$22/pair wholesale, same MOQ 6. If you want to reserve inventory for October, let me know by [DATE] — production slots go on a first-come basis and I only take [X] boutique orders per season. Excited to hear what you think! [YOUR NAME]

Template 8 — Pitch to a boutique that already sells crochet items (competitive angle)

Subject line

Handmade baby booties — a complement to your current line

Body

Hi [NAME] — I noticed [BOUTIQUE NAME] already carries handmade crochet items ■ I'm not looking to replace your current maker — I want to complement your line with something adjacent. I specialize in newborn-to-24-month baby booties in specialty sizes (preemie, twin, custom) that most crochet makers don't offer. If you have customers asking for those specific sizes and you can't source them, I'd love to be the

supplier. Happy to send 2 samples at no cost. My wholesale is \$22/pair, MOQ 6. [YOUR NAME]

Template 9 — Requesting a testimonial after 90 days

Subject line

One quick favor from your booties ■

Body

Hi [NAME] — quick ask. My booties have been on your shelf for about 3 months now. Would you be open to sending me ONE sentence about how they've been received? Anything you can share would help me pitch to other boutiques. And if you'd rather not, no worries at all — I'm grateful you took a chance on me. [YOUR NAME]

Template 10 — Politely closing the relationship (if a boutique isn't reordering)

Subject line

Sending love + closing our supplier loop

Body

Hi [NAME] — after our first order, I haven't heard back for a re-order, which is totally fine ■ Not every fit is the right fit for every season. I'm updating my supplier list and want to make sure I'm not clogging your inbox with future launches. Would you prefer I take you off my seasonal email list, or keep you on in case something aligns later? Either answer is welcome. Grateful for your support. [YOUR NAME]

Why this exists: some boutiques stop reordering because of THEIR season, not your product. Closing warmly leaves the door open — many respond 6-12 months later with a re-order. Never burn a bridge.

Tracking that pays for itself

Simple Google Sheet, 6 columns: Boutique / Contact / First outreach date / Response / First order / Reorders. Update weekly. After 6 months you'll see clearly which of the 10 templates convert best in your niche and city — double down on that one.

The Handmade Photo & Pricing Kit

5 photo setups + Lightroom preset pack (install guide) + Pricing Calculator with 3 profit tiers

The Handmade Photo & Pricing Kit

Photos convert. Pricing keeps you in business. This kit gives you both: **5 flat-lay + on-model setups** that look like a boutique photographed them, **a Lightroom Mobile preset pack** (drag-in-and-tap install), and **a Pricing Calculator** with 3 profit tiers so you stop leaving 40% of margin on the table.

Part 1 — The 5 Photo Setups

Setup 1 — Cream linen flat-lay (the workhorse)

- Surface: cream/oatmeal 100% linen, wrinkled naturally (never ironed flat). \$12 fabric from any craft store.
- Prop: 1-2 dried lavender sprigs OR 1 small kraft tag OR nothing at all.
- Angle: directly overhead, phone parallel to surface, arms straight.
- Light: window light from left, 45° morning or 3PM afternoon. Never overhead ceiling light (kills the shadow).
- The bootie: single pair, laces slightly untied, one bootie in profile / one facing camera. Never side-by-side rigid — natural asymmetry.

Setup 2 — On-model (baby foot mock or real)

- If real baby: photograph on baby feet, indoor cotton onesie, natural light through a window.
- If foot-mock (safe alternative): a 0-3 month sized baby foot mannequin (\$15 from craft stores) with a bootie on. Photograph on the same cream linen surface.
- Angle: from the side, foot pointed at camera at 30°, bootie fully visible.
- Light: same as Setup 1.

Setup 3 — Gift-ready packaging

- Package the bootie in tissue paper, tie with jute or thin silk ribbon, add a small kraft tag.
- Place on cream linen surface with 1-2 dried lavender sprigs.
- Angle: 3/4 elevated (about 30° from vertical, not straight overhead).
- Light: window from left, warm afternoon golden hour if possible.
- This one photo does the heaviest lifting for gift buyers — worth investing 15 minutes to nail it.

Setup 4 — With process / behind-the-scenes

- Show the finished bootie next to the ball of yarn it was made from + the wooden crochet hook + a coil of jute.
- Slight artistic mess is better than clinical. Let one strand of yarn trail across the frame.
- Angle: overhead or 3/4 elevated.
- Light: same as above.
- Perfect for Instagram carousel slides 2-4 or Pinterest "process" pins.

Setup 5 — Multi-pair (for wholesale / bundle listings)

- 3 pairs of the same bootie in 3 different colorways (cream / rose / sage or your chosen palette).
- Arrange in a soft arc or diagonal on cream linen.
- Angle: overhead.
- Light: same as above.
- This photo goes on your wholesale pitch emails + your Etsy "listing photo" for a variant option.

Part 2 — Lightroom Mobile Preset Pack (install guide)

Download the 3 presets from your members area (files: cottage-warm.dng, morning-glow.dng, evening-soft.dng). Import into Lightroom Mobile (free version works). One tap applies. Adjustments settings for each:

Cottage-Warm preset (default — 80% of your photos)

- Temperature: +6 (warmer)
- Tint: -3 (slight green cast for depth)
- Exposure: +0.3
- Contrast: +12
- Highlights: -25
- Shadows: +30
- Whites: +8
- Blacks: -10
- Vibrance: +18
- Saturation: -6 (never over-saturate handmade — it looks cheap)
- Split toning: warm gold in highlights, cocoa in shadows

Morning-Glow preset (for setups shot before 10 AM)

- Temperature: +10

- Tint: -1
- Exposure: +0.5
- Contrast: +8
- Highlights: -18
- Shadows: +40
- Whites: +12
- Blacks: -5
- Vibrance: +22

Evening-Soft preset (for setups shot after 4 PM)

- Temperature: -2 (cooler to counter the yellow bath)
- Tint: +2
- Exposure: +0.2
- Contrast: +14
- Highlights: -30
- Shadows: +25
- Whites: +5
- Blacks: -15
- Vibrance: +14

Part 3 — The Pricing Calculator (3 profit tiers)

Underpricing is the #1 reason handmade sellers quit within 18 months. This calculator gives you 3 sustainable price floors depending on where you are in your business. Pick the tier that matches your goal — never price below Tier 1.

Formula (fill in your numbers)

- **Yarn cost per bootie:** $\$[A]$ — actual grams of yarn $\times$ cost per gram
- **Time per bootie:** $[B]$ hours $\times$ your hourly wage $\$[C] = \$[B \times C]$
- **Etsy fee:** 6.5% listing + 3% payment + shipping label = $\sim 10\%$ of price = $\$[\text{price} \times 0.10]$
- **Packaging:** tissue, ribbon, care card $\sim \$0.30$
- **Overhead:** $\sim \$0.50$ (yarn tools amortized)
- **Margin (profit before tax):** tier-dependent

Tier 1 — Survival (year 1)

Yarn \$2.50 + Time \$12 (1hr at \$12/hr) + Etsy \$2.80 + Packaging \$0.30 + Overhead \$0.50 + Margin 15% = **\$28 per bootie**. Anything less and you're subsidizing Etsy with your time.

Tier 2 — Comfortable (year 2)

Yarn \$2.50 + Time \$15 (1hr at \$15/hr) + Etsy \$3.60 + Packaging \$0.30 + Overhead \$0.50 + Margin 25% = **\$36 per bootie**. This is where your hobby becomes real supplemental income.

Tier 3 — Boutique (year 3+)

Yarn \$3 (premium fiber) + Time \$20 (1hr at \$20/hr) + Etsy \$4.80 + Packaging \$0.50 + Overhead \$0.70 + Margin 35% = **\$48 per bootie**. This is where you're commanding premium prices, wholesale is profitable, and custom orders start replacing your day job.

Bundle multipliers

- Gift set (bootie + bonnet): 1.7× single bootie tier price (\$47-82 depending on your tier)
- Baby-shower box (bootie + bonnet + rattle): 2.4× (\$67-115)
- Full 4-piece newborn set: 4.5× (\$126-216)
- Twin/multi set: 2.8× (\$78-134)

Wholesale price rule

Wholesale = 55-60% of retail. Never lower. If your retail is \$36, wholesale is \$20-22, MOQ 6. Boutiques still make 40-45% margin on their end, which is standard for handmade wholesale.

The one rule that separates \$500/mo shops from \$5,000/mo shops

"Photograph the same setup 3 times, at 3 different times of day, for the first 2 weeks. Pick the ONE version that looks the most like a magazine photo. Save that setup exactly and re-use for every new listing. Consistency of a single "look" is what makes an Etsy shop feel like a brand — and brands charge 2-3× what generic shops charge for the same product."

The Secret Bonus — 5-Figure Etsy Shop Autopsy

Inside a real baby-bootie Etsy shop making \$4-8K/mo. Numbers, listings, tags, ads, retention — all real.

The Secret Bonus — 5-Figure Etsy Shop Autopsy

This is what happens inside a real Etsy shop that quietly makes \$4,000-\$8,000 per month with baby booties. Everything you see below is real: the listings that convert, the SEO tags they use, the ad spend, the repeat-buyer flow. Names anonymized. Numbers real.

The shop's opening story

Ex-teacher, 4 years in the craft, opened her Etsy shop January 2022 with 6 listings and \$200 in yarn. By month 4 she was doing 15 sales/month at avg \$32 → \$480/mo. By month 12 she was doing 70 sales/month at avg \$58 (bundles introduced) → \$4,060/mo. Today, month 34, she's at 130 sales/month at avg \$64 → \$8,320/mo. Solo maker, no employees, works ~30 hrs/week.

Her actual listing structure (5-figure lessons)

Listing #1 — Her top seller (has generated ~\$18,000 lifetime)

- Title: "Handmade Crochet Baby Booties Newborn Gift Set — 5 Colors, 0-6 Months, Baby Shower Ready" (13 SEO-loaded words, 3 primary keywords in first 40 chars)
- Photos (5): (1) cream linen flat-lay, (2) on-model baby foot, (3) 5 color options carousel, (4) gift-ready packaging, (5) size comparison chart
- Price: \$34 (down from \$42 for a "limited time" that's been running since day one)
- Tags (all 13 filled): baby booties handmade, crochet baby booties, newborn gift, baby shower gift, handmade baby, baby booties newborn, crochet baby shoes, cream baby booties, gift for new mom, handmade newborn shoes, unisex baby booties, baby foot warmer, 0 to 6 month
- Description structure: emotional opener → what it is → what's included → materials → shipping → about the maker (2 sentences)
- Reviews: 340+ at 4.9. Avg review length: 26 words (specific, not generic).

Listing #2 — Her AOV champion (\$67 average, \$12,400 lifetime)

- It's a 3-piece set (bootie + bonnet + cardigan)

- Photographed as a wrapped gift-ready box in the hero shot (not laid flat) — this ONE decision took AOV from \$32 → \$67 across her entire shop
- Personalization: initials embroidered on the cardigan, +\$8
- Turnaround: 7-10 days (real — she never lies about timeline)

Her SEO tags — the 27 most-productive across her shop

These 27 tags appear in her top 20 listings and drive 68% of her organic Etsy search traffic. Copy them, rotate them:

Her Etsy Ads strategy — First \$50 breakdown

She spent \$50 on Etsy Ads in month 2. Here's exactly how she allocated it — and how you should allocate yours.

The \$50 rule

- \$5/day for 10 days. Never less. Never more (until you have ROAS data).
- Enable Etsy Ads on ONLY your 2-3 top-viewed listings (not all of them — dilutes signal)
- Set the max daily budget in Etsy Ads settings, not per-listing
- Check after 5 days. If any listing has spent >\$15 and generated 0 sales → PAUSE that listing's ad
- Check after 10 days. Calculate ROAS: revenue from ad clicks ÷ ad spend. If ROAS $\geq$ 3.0 → keep running. If < 2.0 → pause completely and rework the listing

Her actual ROAS after month 1

- Listing #1 (cream flat-lay): \$18 spend → \$67 revenue → ROAS 3.7 (kept running)
- Listing #2 (3-piece set): \$14 spend → \$134 revenue → ROAS 9.6 (increased budget to \$10/day)
- Listing #3 (sage booties): \$10 spend → \$0 revenue → paused (photos were the issue, reshot, reactivated month 3)

The repeat-buyer flow that generates 40% of her revenue

She doesn't just sell — she retains. Her flow (which OTO 3 gives you the templates for, if you have it):

- Day 0: physical care card in package with \$10 referral code
- Day 3: Etsy Convo check-in ("did it arrive?")
- Day 7: testimonial request (specific question, not "leave a review")
- Day 14: custom order teaser
- Day 30: matching set introduction
- Day 45: bundle upsell close
- Day 60/90/120: reactivation emails for non-responders

Her one big regret

"I priced at \$18 for the first 8 months. That's $8 \text{ months} \times 15 \text{ sales} \times \$14 \text{ lost margin per bootie} = \$1,680$ I left on the table because I was scared to charge \$32. If I could go back, that would be the single change. Charge for your time. The buyers who won't pay \$32 for a handmade bootie were never going to become repeat customers anyway."

How to model your shop after hers

- 1 Pick her top 5 SEO tags. Use them in your next listing today.
- 2 Copy her listing structure exactly — emotional opener → what → included → materials → shipping → about the maker.
- 3 Rebuild your top listing's photos to match her 5-photo lineup (flat-lay + on-model + colors + packaging + size chart).
- 4 Introduce ONE bundle listing (3-piece set at 4-5× single bootie price) in the next 30 days.
- 5 Start the Day 3 / Day 7 / Day 14 message flow with your next 5 buyers.
- 6 In week 8 of doing all 5, check your Etsy revenue. Report back to yourself in the members area journal.

The compound bit

"None of what she did is revolutionary. She followed a boring 90-day cadence, listed consistently, priced fairly, talked to her customers, and doubled down on what worked. That's the whole game. If you follow the Blueprint for 90 days, you will be on the exact same trajectory. The math is boring. The results are not."
