How to read this chart

Find your fabric → set the needle, thread and stitch → finish and press it the right way. Or go the other way: start from a pattern in the index at the back and see which fabric, needle and stitch it wants.

3 checks before you cut. (1) **Woven or knit?** Pull crosswise: if it stretches more than 10%, it's a knit — use a ballpoint/stretch needle and 1 cm / 3/8 in seam allowance. (2) **Weight:** light (under 120 gsm / 3.5 oz), medium (120–220 gsm), heavy (over 220 gsm / 6.5 oz). Size the needle up as the weight goes up. (3) **Stretch % for knit patterns:** fold 10 cm of fabric and stretch it along a ruler: to 13 cm = 30%, to 15 cm = 50%.

Change your needle every 8 hours of sewing or at every new garment. A dull or wrong needle causes 80% of skipped stitches, snags and puckers. Test on a double scrap first: sew 10 cm, check both sides, adjust tension (default 4) before the real seam.

Yardage

The index gives the main fabric needed in meters for fabric **150 cm / 60 in wide** and **115 cm / 45 in wide**, in 3 size groups (women 34–40 / 42–46 / 48–56 · men 44–48 / 50–52 / 54–56), taken from the yardage tables in each pattern's instruction booklet (the largest size of the group). 1 m = 1.09 yd. For your exact size, lining, rib and interfacing, check the "Yardage by size" table in the booklet. Add 10% for directional prints, nap (corduroy, velvet) and plaids.

Needle guide

Needle	Use it for
Universal 70/10–90/14	Most wovens: cotton, poplin, linen, twill. Slightly rounded tip, works on some stable knits.
Microtex / Sharp 60/8–80/12	Tight, fine and slippery wovens: satin, silk, microfiber, lawn, precise topstitching.
Jersey / Ballpoint 70/10–90/14	Cotton jersey, rib, french terry, fleece, sweater knits — pushes fibers aside instead of piercing them.
Stretch 75/11–90/14	Knits with spandex/elastane and swimwear/activewear. Special eye stops skipped stitches.
Denim / Jeans 90/14–110/18	Denim, canvas, heavy twill, multiple layers.
Topstitch 90/14–100/16	Thick topstitch thread (30 wt): larger eye and groove.
Twin needle 4.0/90 stretch	Professional knit hems on tees and hoodies (two parallel rows, zigzag underneath).

Stitch length guide

Setting	Use it for
2.0 mm	fine/sheer fabrics, curves, reinforcing corners
2.5 mm	standard seams on light–medium wovens (default)
3.0 mm	heavy fabrics, denim, linen, understitching
3.5–4.0 mm	topstitching, edge-stitching on thick fabric
4.0–5.0 mm	basting, gathering, ease-stitch (loosen the tension)
Zigzag 0.5–1 × 2.5 mm	knit seams on a regular machine
Zigzag 3–4 × 2 mm	seam finish on wovens (overcast the raw edge)

Seam finishes

Finish	When and how
Zigzag / overcast	Any woven. Zigzag 3–4 mm wide × 2 mm long on each allowance, the needle going just off the edge.
Serged (overlocked)	The fastest; 4-thread for knits (seam + finish in one), 3-thread for finishing woven edges.
French seam	Sheer and light wovens. Sew wrong sides together at 0.6 cm / 1/4 in, trim to 3 mm, press, fold right sides together, sew at 0.9 cm / 3/8 in.
Flat-felled	Shirts, jeans, pajamas. Sew at 1.5 cm, trim one allowance to 0.5 cm, fold the wide one over it, edge-stitch flat.
Hong Kong / bound	Unlined jackets and trousers. Wrap each allowance with a 2.5 cm bias strip.
Pinked	Tightly woven fabrics that don't fray much (quilting cotton, felt). Pinking shears along the edge.

Interfacing & pre-wash

The two steps beginners skip — and regret.

Interfacing

Type	Where
Light fusible woven	Collars, stands, cuffs, plackets, button bands on shirting and cotton.
Medium fusible woven	Waistbands, flies, pocket welts and jacket facings on twill and denim.
Knit fusible (tricot)	Drapey wovens (rayon, crepe) and knits — it bends with the fabric.
Stay tape / clear elastic	Shoulders and necklines on knits; wrap edges on bias; zipper edges on stretch.
Sheer fusible / silk organza	Satin, charmeuse, lawn — invisible support.

Fuse with a dry iron at wool setting under a damp press cloth, 10–12 seconds per spot with firm pressure — don't slide. Let cool flat 5 minutes before handling.

Pre-wash checklist

1. Wash and dry the fabric the way you will wash the garment — before cutting. Cotton and linen shrink 3–8%.
2. Serge or zigzag the cut ends first so they don't fray in the wash.
3. Denim and red/dark cottons: wash separately the first time (dye bleeds); add a color catcher.
4. Rayon/viscose: wash cold, hang dry — then it won't shrink further if you care for the garment the same way.
5. Wool, silk and dry-clean-only fabrics: steam-shrink (hover the iron 1 cm above with lots of steam), don't wash.
6. Press the fabric flat and check the grain: the crosswise threads should be at 90° to the selvage. Pull on the bias to straighten if needed.

Pressing temperatures

Fiber	Setting	Tip
Linen	230 °C / 445 °F, lots of steam	press while slightly damp
Cotton	200 °C / 390 °F, steam	press every seam before crossing it
Wool	150 °C / 300 °F, steam	always a press cloth
Silk / rayon / viscose	120–150 °C / 250–300 °F	press cloth, from the wrong side
Polyester / nylon / spandex	110–150 °C / 230–300 °F	press cloth; test on a scrap — it melts
